

13. Select. Checks & Radios. Range

Reja:

▼ Select

Bootstrap 5 yordamida `<select>` "tag"iga style berish imkoniyati mavjud. Uning uchun elementimiz uchun **.form-select** klassi ko'rsatib o'tilish kerak

```
<div class="container">
  <select class="form-select" aria-label="Select uchun misol">
    <option selected>Select menyusi</option>
    <option value="1">Birinchi</option>
    <option value="2">Ikkinchi</option>
    <option value="3">Uchinchi</option>
  </select>
</div>
```

O'lchovi (Sizing)

```
<select class="form-select form-select-lg mb-3" aria-label=".form-select-lg uchun misol">
  <option selected>Select menyusi</option>
  <option value="1">Birinchi</option>
  <option value="2">Ikkinchi</option>
  <option value="3">Uchinchi</option>
</select>

<select class="form-select form-select-sm" aria-label=".form-select-sm uchun misol">
  <option selected>Select menyusi</option>
  <option value="1">Birinchi</option>
  <option value="2">Ikkinchi</option>
  <option value="3">Uchinchi</option>
</select>
```

Bir nechta (Multiple)

```
<select class="form-select" multiple aria-label="Multiple select uchun misol">
  <option selected>Select menyusi</option>
  <option value="1">Birinchi</option>
  <option value="2">Ikkinchi</option>
  <option value="3">Uchinchi</option>
</select>
```

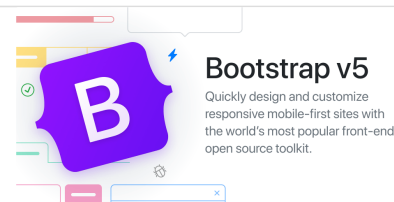

Disabled

```
<select class="form-select" aria-label="Disabled select uchun misol" disabled>
  <option selected>Select menyusi</option>
  <option value="1">Birinchil</option>
  <option value="2">Ikkinchil</option>
  <option value="3">Uchinchil</option>
</select>
```

Select

Custom menus need only a custom class, .form-select to trigger the custom styles. Custom styles are limited to the 's initial appearance and cannot modify the s due to browser limitations. You may also choose from small and large custom selects to

 <https://getbootstrap.com/docs/5.0/forms/select/>

▼ Checks

Bootstrap 5 yordamida hamma **brauzerlarda** bir xil **ko'rinishga** ega bo'lgan **Checkbox** yaratish imkoniyati mavjud

```
<div class="form-check">
  <input class="form-check-input" type="checkbox" value="" id="default-checkbox">
  <label class="form-check-label" for="default-checkbox">
    Default checkbox
  </label>
</div>
<div class="form-check">
  <input class="form-check-input" type="checkbox" value="" id="checked-checkbox" checked>
  <label class="form-check-label" for="checked-checkbox">
    Tanlangan checkbox
  </label>
</div>
```

Disabled

```
<div class="form-check">
  <input class="form-check-input" type="checkbox" value="" id="disabled-checkbox" disabled>
  <label class="form-check-label" for="disabled-checkbox">
    Disabled checkbox
  </label>
</div>
```

Inline checkboxes

```
<div class="form-check form-check-inline">
  <input class="form-check-input" type="checkbox" id="inline-checkbox-1" value="option-1">
  <label class="form-check-label" for="inline-checkbox-1">1</label>
</div>
<div class="form-check form-check-inline">
  <input class="form-check-input" type="checkbox" id="inline-checkbox-2" value="option-2">
```

```

<label class="form-check-label" for="inline-checkbox-2">2</label>
</div>
<div class="form-check form-check-inline">
  <input class="form-check-input" type="checkbox" id="inline-checkbox-3" value="option-3" disabled>
  <label class="form-check-label" for="inline-checkbox-3">3 (disabled)</label>
</div>

```

Switch

```

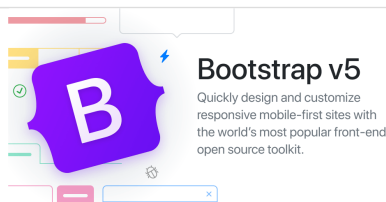

<div class="form-check form-switch">
  <input class="form-check-input" type="checkbox" id="default-switch">
  <label class="form-check-label" for="default-switch">Switch ko'rinishidagi checkbox</label>
</div>

```

Checks and radios

Create consistent cross-browser and cross-device checkboxes and radios with our completely rewritten checks component.

 <https://getbootstrap.com/docs/5.0/forms/checks-radios/>

▼ Radios

Bootstrap 5 yordamida hamma **brauzerlarda** bir xil **ko'rinishga** ega bo'lgan **Radio tugma** yaratish imkoniyati mavjud

```

<div class="form-check">
  <input class="form-check-input" type="radio" name="default" id="default-radio">
  <label class="form-check-label" for="default-radio">
    Default radio
  </label>
</div>
<div class="form-check">
  <input class="form-check-input" type="radio" name="default" id="checked-radio" checked>
  <label class="form-check-label" for="checked-radio">
    Tanlangan radio
  </label>
</div>

```

Disabled

```

<div class="form-check">
  <input class="form-check-input" type="radio" name="default" id="disabled-radio" disabled>
  <label class="form-check-label" for="disabled-radio">
    Disabled radio
  </label>
</div>

```

Inline radios

```
<div class="form-check form-check-inline">
  <input class="form-check-input" type="radio" name="inline-radio" id="inline-radio-1" value="option-1">
  <label class="form-check-label" for="inline-radio-1">1</label>
</div>
<div class="form-check form-check-inline">
  <input class="form-check-input" type="radio" name="inline-radio" id="inline-radio-2" value="option-2">
  <label class="form-check-label" for="inline-radio-2">2</label>
</div>
<div class="form-check form-check-inline">
  <input class="form-check-input" type="radio" name="inline-radio" id="inline-radio-3" value="option-3" disabled>
  <label class="form-check-label" for="inline-radio-3">3 (disabled)</label>
</div>
```

Checks and radios

Create consistent cross-browser and cross-device checkboxes and radios with our completely rewritten checks component.

 <https://getbootstrap.com/docs/5.0/forms/checks-radios/>

▼ Range

Bootstrap 5 yordamida **range (oraliq)** ko'rinishidagi "input"ga ham **style** berish **imkoniyati** mavjud

```
<label for="range-example" class="form-label">Range (oraliq) uchun misol</label>
<input type="range" class="form-range" id="range-example">
```

Sozlamalari (configurations)

```
<label for="range-example" class="form-label">Range (oraliq) sozlamalari uchun misol</label>
<input type="range" class="form-range" min="0" max="5" step="1" id="range-example">
```

Range

Create custom controls with .form-range. The track (the background) and thumb (the value) are both styled to appear the same across browsers. As only Edge Legacy and Firefox supports "filling" their track from the left or right of the thumb

 <https://getbootstrap.com/docs/5.0/forms/range/>
