▼ Images (rasmlar)

Bootstrapning rasmlarni moslashuvchan qilish uchun va ularga style berish uchun maxsus klasslari mavjud

Responsive (moslashuvchan) rasmlar

Bootstrapning **.img-fluid** klassi rasmlarni moslashuvchan qilish uchun ishlatiladi va uning yordamida veb sahifaga joylashtirilayotgan rasm hech qachon ota-ona (parent) elementdan katta bo'lib ketmaydi

```
<style>
  .image-container {
    border: 1px solid red;
    width: 200px;
  }
</style>

-----

<div class="image-container">
  
</div>
```

Thumbnail rasmlar

```

```

Rounded rasmlar

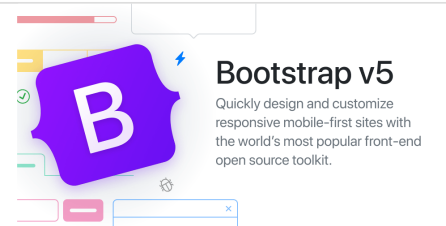

```

```

Images

Images in Bootstrap are made responsive with `.img-fluid`. This applies `max-width: 100%;` and `height: auto;` to the image so that it scales with the parent element. In addition to our border-radius utilities, you can

▼ Figures

Bootstrapda figure yordamida rasm va mattni birga ekranga chiqarish imkoniyati mavjud

```
<figure class="figure">
  
  <figcaption class="figure-caption">Tepadagi rasm uchun sarlavha</figcaption>
</figure>
```

Figures

Anytime you need to display a piece of content-like an image with an optional caption, consider using a `.figure`. Use the included `.figure`, `.figure-img` and `.figure-caption` classes to provide some baseline styles for
