

35. Vertical align, visibility

Reja:

▼ Vertical align

Elementning **vertical-align** xossasiga **qiymat** ko'rsatuvchi maxsus klasslar to'plami

baseline top middle bottom text-top text-bottom

```
<span class="align-baseline">baseline</span>
<span class="align-top">top</span>
<span class="align-middle">middle</span>
<span class="align-bottom">bottom</span>
<span class="align-text-top">text-top</span>
<span class="align-text-bottom">text-bottom</span>
```

Vertical alignment

Change the alignment of elements with the vertical-alignment utilities. Please note that vertical-align only affects inline, inline-block, inline-table, and table cell

▼ Visibility

Elementni veb sahifadan berkitish uchun mo'ljallanga maxsus klasslar to'plami

```
<div class="visible">Ko'rinarli div</div>
<div class="invisible">Berkatilgan div</div>
```

Visibility

Set the visibility of elements with our visibility utilities. These utility classes do not modify the display value at all and do not affect layout - .invisible elements still take up
